

UpperMind.AI

Your AI That Knows, Thinks, and Does

An enterprise AI assistant that understands your documents, integrates with your tools, answers questions, and takes action.

What is UpperMind?

Uppermind is an AI assistant trained on your internal knowledge — not just to answer, but to act.

- ◆ Learns from your documents
- ◆ Connects to your tools
- ◆ Answers in your language
- ◆ Automates actions across systems

No templates. No predefined scripts.
Just real understanding — and real results.

Who is it for?

HR Teams

Answers employee questions, supports onboarding, and explains policies 24/7.

Marketing

Remembers past campaigns, helps you stay on brand, and even suggests content.

Sales

Finds product specs, handles objections, connects with your CRM, and supports reps in real time.

Finance

Explains reimbursement rules, monitors budgets, and controls who sees what.

Operations

Knows your workflows and procedures — and keeps things running smoothly.

Executives

Surfaces summaries, metrics, and strategic docs for better, faster decisions.

Your Data. Your Terms

Uppermind works in the cloud — or on-premise.

For enterprises with strict data policies, we support full internal deployment.

Your data stays with you. Always.

I don't just know things. I understand, connect, act, and protect.

dijitalcozumler@datamarket.com.tr

You have documents, policies, presentations, manuals... I read them all. But I don't just extract keywords — I understand meaning, context, structure.

AI That Learns Your Language

UpperMind is custom-trained on your internal policies, procedures, manuals, reports so it understands the way your organization thinks and speaks.

Connects Where You Work

Seamlessly integrates with your existing tools like Slack, Microsoft Teams, SharePoint, Jira, and CRMs to access data, automate processes, and stay in sync.

Context-Rich Answers, Not Just Search Results

Ask in natural language — get responses grounded in your documents, with clear references and human-like reasoning tailored to your company.

From Question to Action Instantly

Don't just ask. Delegate. I can trigger workflows, submit forms, assign tasks, and notify the right people — directly from your command.

Built for Enterprise Security

With role-based access control, sensitive information stays protected. I know who can see what and I follow your organization's rules, not mine.

Multilingual and Role-Aware

I support global teams with multilingual capabilities and adapt my answers based on department, role, and context — just like a real teammate would.
